

EASTERN MICHIGAN UNIVERSITY

Center for Health Disparities Innovations and Studies

● Photovoice:

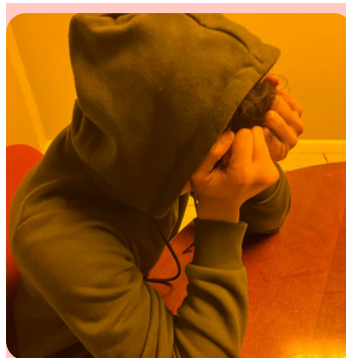

- It is an Art-Based approach in which participants express perspectives using visual representations of photos.
- Involve informants, stakeholders, community leaders, and policymakers in addressing concerns through public forums and photo exhibitions.

● Our Photovoice Project:

- Included 39 participants from Southeast and West Michigan
- As a result, 183 photos were taken that reflected root causes and protective factors in their community.

Unsafe Neighborhood

Mental Health Issues

Liquor Outlet

Community Garden

Explore unique viewpoints
through visual photography.
